Vehicles with a list price including any additional options over 40,000 pay an additional 310 supplement for the first five years after the end of the first licence.

From 1 September 2017, certain new vehicles will be type-approved using the World Harmonised Light Vehicle Test Procedure (WLTP), which is a new, more realistic test procedure for measuring fuel consumption and CO₂ emissions. From 1 September 2018 WLTP will fully replace the New European Drive Cycle (NEDC), which is the current test procedure. Due to more realistic test conditions, the fuel consumption and CO₂ emissions measured under the WLTP are in many cases higher compared to those measured under the NEDC.
