

Lexus Centres in Wales and Scotland Ready to Re-open

22 June 2020

Lexus will complete the nationwide re-opening of its centres in the coming days with business restarts scheduled for its Welsh and Scottish retailers. Customers will be welcomed with a range of attractive new and used vehicle purchase opportunities available throughout the summer.

In line with the local relaxation of Covid-19 business restrictions, Lexus Cardiff is open to customers from today (22 June). Lexus Glasgow and Lexus Edinburgh are preparing to re-open from 29 June. Centres across England and Lexus Belfast in Northern Ireland resumed retail operations earlier this month.

True to providing the last word in customer care, the sites will be ensuring the safety of all visitors and staff with comprehensive measures in place for social distancing and hygiene. As well as consultations in the showroom, customers will also be able to take unaccompanied test drives, with contactless drop off and collection and scrupulous cleaning of vehicles.

Access to centres will initially be by appointment only, to ensure safe numbers of people are present at any one time. Contact details for centres, including opening days and times, can be found on the [lexus.co.uk](https://www.lexus.co.uk) website.

For those who prefer not to travel, or who are unable to leave home at this time, Lexus is pleased to offer video sales consultations with experts. These will be made available through all UK centres.

Lexus workshops are already providing vehicle servicing, MOT testing and repairs, operating to strict hygiene and operating standards to safeguard customers and technicians.

Enhanced offers on CT and UX

Lexus has enhanced summer offers for two of the most popular models in its market-leading range of luxury self-charging hybrids.

The CT hatchback is now available with 2.9 per cent APR Representative and a £2,000 Hybrid Deposit Contribution, on terms of up to 48 months. This gives a potential saving of £25 per month compared to the terms available prior to the lockdown period. Details and terms and conditions are available [here](#).

Similarly, the new UX urban SUV is being offered with 3.9 per cent APR Representative and a £2,000 Hybrid Deposit Contribution, on terms of up to 48 months. This reduces monthly payments by £35, compared to the pre-lockdown figures. Details and terms and conditions are available [here](#).

Used vehicles and scrappage

Lexus's famous reliability makes an approved used vehicle purchase an attractive proposition, with a new 3.9 per cent APR Representative finance offer available through Lexus Centres until 30 September 2020. Details and terms and conditions are available [here](#).

Lexus has been operating its own scrappage scheme since 2017, giving customers the opportunity to dispose of their old vehicle and gain savings on the recommended retail price of a new model. This currently applies to the CT hatchback, UX, NX, RX and RX L SUVs and ES saloon, with savings of up to £4,000 available.
